A bunch of story trophies and a lot of exploration and completion of centric collectibles. There are 2 online Know My Name trophies to rank on the leaderboard for each feat and Don't Choke on My Smoke for beating someone else to score in Feat. Nothing stands out as particularly difficult, there are no trophies related to difficulties. What are your thoughts on the Just Cause 4 trophy list? Are you going to Platinum? What trophies are you most looking forward to? Just Cause 4 is released on December 04, 2018. Performances are small online challenges that are tracked automatically every time you play a game if you are connected to the Internet. For this trophy you just need to do the minimum just to get your name on the leaderboard, so there is no need to beat someone's score, you just need to perform the desired action at least once. Most of them come naturally when playing the game, you can check your progress at any time on the menu. If your name is written under a power number other than 0, it means you did it. So after playing for a while, be sure to keep an eye on it and perform the actions needed for those you miss. Nothing's too much of a walk anyway. Most of them are quite self-explanatory, but I'll list those that can be tricky: Windwalker: the longest time spent in a tornado field while wingsuiting. This should be unmissable, because the story mission requires you to do it, but if not, tornadoes will randomly appear on the map or you can control after the operation windwalker, in Zona Area. Open Water: the longest time spent piloting a sailboat over 40 knots. Sailboats don't go above 40 knots naturally, so you'll need to attach one or more grab hooks with booster mode at the back of the boat and activate just before hitting them to get to the boat. The ship can start flying in the air, but it does not matter, it should count. Gone Baby Gone: The furthest distance traveled by an aerial enemy after being thrown harness retracting. Attach the hook to the enemy and the other side to the structure, then press the button to release the hook, and the enemy should fly on a little. This is Solis: the furthest distance traveled by an aerial enemy after winding. Use your anchor hook on the enemy and you should eventually kick it in the air, which should count for this challenge. Blown Away: The furthest distance traveled by the enemy on one continuous fire from the wind. Wind guns can be found on silver crates in bases etc, but you can also get one of your stock drops after securing quachas. Frequent Flyer: The furthest distance traveled by a character released from a booster. Your hook will need to be in booster mode, simply attach it to the enemy and press it to watch it fly. Free fall: the furthest autumn distance of the enemy, which was attached to the jack. Your hook will need to be in elevator mode, attach it to the enemy and press to lift the enemy. Enemy.
